

# We are the image from the Future

(slogan on an Athens wall)

[...] The city center does not really work. Most of the shops are burned or destroyed. In riots also trafficlights were destroyed and that's to say really great because it is your decision when you walk and when the cars go...**It is so beautiful to see the city center burned down...** In Patission street two universities still occupied. [...] Highschool kids [...] come there to fight with police. Also many immigrants! Some junkies and hooligans join also....It is fun because some really young kids age 9-10 come in the occupied universities and tell the people. "Hey mister, please teach us how to make a molotov-cocktail..." Also there are hard-core riots with the police and in the gardens of the university girls and boys kiss and pet each other...The streets around are burned. Athens' silicon valley, Stournari street with many shops with computers and electronic equipment is totally destroyed, looted. Some computers were looted, most were burned and destroyed. "Plaisio", a big computer store with three floors is burned completely.

Anarchists, autonomists mainly gather in the Athens university of Economics, which is some blocks away...[...] There is a place of conversations, food (it's fun because when the food is over we go to the Supermarkets near, loot, give some to the people who are in the street and the rest we use in the university. There also exists a media center [...] a radio station is in progress, and a big room to print leaflets and brochures. The law school is also occupied by

leftists, which become a bit more radical (as radical as a leftist can become)...

Exarcheia, the district where the murder happened, is still barricaded. [...] In the roads down from the occupations on the night some times it is dangerous because nazis and policemen work together and try to prevent immigrants from attacking and looting...The next days would show how things will go. We expect occupations of schools and universities. The workers are not on strike, **syndicates and the communist party sabotage us a lot... Damn, after so many years it is still the same... And you know you have to sabotage production to destroy capitalism...** Many people are arrested and the government wants to make use of the antiterror laws, like in France for the Tarnac 9. I think now everybody can see for whom these laws are made for. The enemy within...We can say that some parts of the center have a certain autonomy...and for sure the police will not go in...

**Comrades in all the world, if you want to express your solidarity, which we need a lot, keep on the fights in your countries and make them stronger.**

**They are really afraid of us, believe us, you can not imagine, here now we can see it clearly.**

Resurrection, like we read in the books really exists, we can assure you, we live it...

It is Beautiful!

**In one night "reality", "normality" died...**

**It will happen to your countries soon.**

**Make plans**

**Be ready**

**Call for solidarity from Greece, december 2008**
